WORKPLACE Assessments

Reduce Communication Frustration

Your organization is unique. We provide individualized assessments to determine the needs of your organization to make it accessible and welcoming to the Deaf and hard of hearing.

Serving province-wide, assistive listening devices and communication products are available for all types of communication situations. Sensitivity Training and work space redesign along with assistive equipment may be all that is required.

The assessment includes a written report detailing the suitable options, our equipment specialist's recommendations, costs, and funding resources.

Deaf & Hear Alberta

We are here to help you understand your responsibility in responding to the needs of those with a hearing loss.

We will identify technology and other solutions to support your organization in enhancing its services and achieving your business goals.

Equipment available for reception/information counters, small or large meeting rooms, theatres, churches or sanctuaries and auditoria.
